

ALPHA T88 / 2009

The table frame is made of solid wood and a casted part connecting the wood. The glass has a thickness of 15 or 24 mm and is resting on the frame. The wood is stained and lacquered. Natural wood characteristics like size deviations, cracks and knots are visible. The table can be shipped flat packed. Sand casting is a traditional process of handcrafting; characteristics are pores and irregularities. The product is available in different materials and finishes and can be tailor-made to the needs of the customer.
