

DORIS T63S / 2004

The table frame is made of tubes and casted parts which clamp the glass. The tempered glass has a thickness of 10 mm and is held by casted parts. The table is strong and can bear a lot of weight. The table can be shipped flat packed. Sand casting is a traditional process of handcrafting; characteristics are are pores and irregularities. The product is available in different materials and finishes and can be tailor-made to the needs of the customer.
